

**NAME:**

Tatiane

INTRODUCTION / ABOUT ME:

Experienced software developer with a background in backend development using .NET and C#. Skilled in frontend development with frameworks like Svelte, Blazor, and React. Proficient in Microsoft SQL Server for writing data manipulation queries. Committed to delivering efficient solutions and maintaining high-quality code in fast-paced environments by applying SOLID principles and design patterns.

WORK EXPERIENCE:**Senior Fullstack Engineer - Authentica Solutions**

Mar 2025 - Current

- Maintain and enhance a Blazor and .NET 8 application, developing key frontend features such as dashboards, data display tables, and item registration pages.
- Shift focus to React and TypeScript for new frontend development, leveraging AI-assisted coding tools like Claude to accelerate implementation while ensuring code quality.
- Play a central role in building an internal component library based on Shadcn, published as a private npm package on GitHub, to standardize UI across projects.
- Design and implement core UI components including header, sidebar, navigation menus, layout templates, and user profile pages.
- Conduct extensive refactoring and debugging of AI-generated code to maintain application stability and performance.
- Provide occasional backend support in C# when necessary, despite primarily focusing on frontend development.

Senior Fullstack Developer - Lean Tech

Sep 2022 - Jan 2025

- Develop innovative solutions using Svelte, JavaScript/TypeScript, Sass, .NET, and SQL Server to ensure high performance and scalable applications.
- Collaborate in technical discussions aimed at enhancing company products and promoting continuous improvement.
- Perform refactors and code reviews, providing and receiving constant feedback to team members.
- Use SCRUM and its ceremonies to manage and complete PBIs and User Stories.
- Refactor legacy code to remove technical debt and redesign Razor pages to Svelte framework.

Senior Fullstack Developer - Ouribank

Jun 2020 - Sep 2022

- Lead the creation of the bank's new onboarding process, enabling customers to create accounts through a fully digital environment.
- Develop frontend pages using Blazor, HTML, CSS, and JavaScript to ensure a seamless user experience.
- Engineer high-performance APIs and queue services to integrate client data into legacy systems using .NET Core, C#, SQL Server, Docker, Dapper, and AWS.
- Integrate third-party supplier APIs to streamline payment methods and eliminate the need for SWIFT payments.
- Refactor legacy code by applying quality code practices and creating unit tests to ensure comprehensive test coverage.
- Conduct code reviews and maintain high standards of code quality within the team.
- Mentor team members on technical and business aspects, fostering professional growth and development.

.NET Consultant - Extrafarma

Jun 2019 - May 2020

- Support legacy Windows Forms and WebAPI applications using .NET Framework and C# to ensure continued functionality and performance.
- Collaborate directly with business areas to understand processes and requirements, facilitating effective solutions.

Application Developer - Volvo Group

Nov 2017 - Apr 2018

- Develop and maintain a website for company engineers to log their R&D projects using .NET Framework and SharePoint.
- Maintain internal projects for related business operations to ensure continued functionality and performance.

Mid Systems Analyst - Capgemini

Nov 2015 - Oct 2017

- Elaborate a comprehensive website for the State Treasury Office using SharePoint, JavaScript, and Bootstrap.
- Guide the initial development phase of a website designed to provide taxation information to taxpayers using SharePoint, JavaScript, and Bootstrap.

Junior Analyst Programmer - Iteris

Nov 2014 - Nov 2015

- Resolve bugs and implement new features daily using .NET Framework, JavaScript, and SQL Server as part of a dedicated maintenance team.
- Interact directly with end users to gather and act on feedback.
- Monitor and ensure optimal system performance through daily log tracing.
- Create comprehensive documentation for end users and new team members to facilitate smooth onboarding and user experience.

Junior Developer - Stefanini

Mar 2014 - Nov 2014

- Collaborate within a squad to develop a new supplier portal for one of Brazil's largest hospitals using .NET Framework, ASP.NET, and SQL Server.
- Develop a new intranet for a local construction company using the same technology stack.
- Engage directly with senior developers to learn best practices in code quality and time management.
- Participate in daily meetings to monitor and ensure project progress.

EDUCATION:

- Specialisation postgraduate programme - Software Engineer | Universidade Estácio de Sá, Jul 2022 - Jul 2023
- Computer Science | Universidade Estácio de Sá, Jan 2019 - Dec 2021

SKILLS:

- .NET (C#)
- Frontend frameworks (Svelte, Blazor, React)
- ASP.NET MVC
- Microsoft SQL Server
- Claude Code and Github Copilot
- Amazon Web Services
- Kanban and SCRUM
- Git/Azure Devops
